

CONTRIBUTIONS TO THE KNOWLEDGE OF THE DIVERSITY OF CERAMBYCIDS (COLEOPTERA: CHRYSOMELOIDEA: CERAMBYCIDAE) FROM OLTENIA FAUNA, ROMANIA

SERAFIM Rodica, CHIMIȘLIU Cornelia

Abstract. The paper presents data on the diversity of Cerambycidae species from Oltenia (South-Western Romania) based on bibliographical sources (1865-2010). Taxa list includes 156 species from 86 genera and 37 tribes, belonging to 5 subfamilies, identified in 205 collection sites.

Keywords: Cerambycidae, Oltenia, Romania.

Rezumat. Contribuții la cunoașterea diversității cerambicidelor (Coleoptera: Chrysomeloidea: Cerambycidae) din fauna Olteniei, România. Autorii prezintă date privind diversitatea speciilor de Cerambycidae din Oltenia pe baza surselor bibliografice (1865-2010). Lista de taxoni include 156 specii incluse în 86 genuri și 37 triburi aparținând la 5 subfamilii, semnalate din 205 situri de colectare.

Cuvinte cheie: Cerambycidae, Oltenia, România.

INTRODUCTION

The longhorn beetles (Cerambycidae; also known as Long-horned beetles or Longicorns) are a cosmopolitan family of beetles, typically characterized by extremely long antennae, which are often as long as or longer than the beetle's body. In various members of the family, however, the antennae are quite short and such species can be difficult to distinguish from related beetle families such as Chrysomelidae. This family is classified in the superfamily Chrysomeloidea. The family is large, with over 40,000 species described worldwide. A total of 677 native species are known to occur in Europe. Longhorn beetles are all phytophagous. Several are serious pests, with the larvae boring into wood, where they can cause extensive damage to either living trees or untreated lumber (or, occasionally, to wood in buildings; the old-house borer, *Hylotrupes bajulus*, being a particular problem indoors). A number of species mimic ants, bees, and wasps, though a majority of species are cryptically colored.

Oltenia entirely includes the counties: Gorj, Dolj and parts of the counties: Mehedinți (mainly in Oltenia, but the western part belongs to Banat), Vâlcea (mainly in Oltenia, but the eastern part belongs to Muntenia), Olt (the western half, the former Romanați County), Teleorman (only the village Islaz) (Fig. 1).

MATERIALS AND METHODS

The paper presents data on the diversity of Cerambycidae from Oltenia based on bibliographical sources.

The data concerning the distribution of Longhorned beetles in Oltenia were published the late nineteenth century and early twentieth century by FRIVALDSKY (1865), KUTHY (1900), CSIKI (1904, 1905), VÂNGEL (1906), MARCU (1928, 1929).

The data from the period 1949-1975 were published by GEORGESCU et al. (1949), PANIN & SĂVULESCU (1961), SĂVULESCU (1969, 1972), NEGRU (1971), IENIȘTEA (1975).

A first synthesis of the data of literature in the period 1928-1998, on the Carpathian region of Oltenia, was published by BOBÎRNAC et al. (1999).

Numerous data on species diversity were taken from the collections catalogues of museums in Bucharest, Drobeta-Turnu Severin, Craiova, Târgu Mureş [SERAFIM (1985, 2005, 2006, 2007, 2009, 2010); BOTU (1998); SERAFIM et al. (2004); TOGĂNEL (2004); SERAFIM & CHIMIŞLIU (2009)].

We also mention the papers concerning protected natural areas in Oltenia: IENIŞTEA (1975), RUCĂNESCU (1992, 1992a; 1997), RUCĂNESCU & PATKO (1995), CHIMIŞLIU (2006, 2007, 2007a, 2008, 2008a), TATOLE et al. (2009).

Nomenclature and systematical order are according to those used by SAMA (2005) in "Fauna Europaea", DANILEVSKY (2007) in "A check-list of Longicorn Beetles (Coleoptera, Cerambycoidea) of Europe", HOSKOVEC & REJZEK (2009) in "Longhorn beetles (Cerambycidae) of the West Palaearctic region" and LOBL & SMETANA (2010) in "Catalogue of Palaearctic Coleoptera".

The species mentioned in the consulted papers were collected in those five counties of Oltenia. Collection sites are presented within those five counties, in alphabetical order.

The subfamilies, tribes, genera, and species are arranged in alphabetical order.

Stenurella septempunctata (FABRICIUS 1792): Piatra Cloșani (MARCUS, 1928); Râmnicu Vâlcea without other data (SERAFIM, 2006); Slatina without other data (SERAFIM, 2006); Breznița July 6, 1965 (SERAFIM, 2006); Orșova May 23, 1966, June 18, 1970, June 28, 1969, (SERAFIM, 2006); the Danube Gorges (Cazanele Dunării) May 25, 1966-June 10, 1967 (SERAFIM, 2006); Mraconia Valley June 7, 1967 (SERAFIM, 2006); Eșelnița June 3, 1968, June 17-20, 1970 (SERAFIM, 2006); June 25-August 26, 1985 (BOTU, 1998); Grața, Orșova June 28, 1969 (SERAFIM, 2006); Cerneți July 9, 1976, May 24-July 10, 1985 (BOTU, 1998); Vodița monastery June 21-27, 1977 (BOTU, 1998); Erghevița June 29, 1977 (SERAFIM, 2006); Nicolae Titulescu, Palanca Forest June 23-25, 1980 (SERAFIM, 2006); Scornicești July 23, 1980 (SERAFIM, 1985, 2006); Balș, Saru Forest June 22, 1981 (SERAFIM, 1985, 2006); Podari June 20, 1982 (SERAFIM, 1985, 2006); Racovița July 16, 1982 (SERAFIM et al., 2004); Gura Motrului June 21, 1983 (SERAFIM, 2006); Strehaia June 24, 1983 (SERAFIM, 1985, 2006); Balota July 12, 1983 (SERAFIM, 2006); Schitu Topolniței June 8, 1984 (SERAFIM, 2006); Motru Sec, Lupșa Valley June 18, 1992 (SERAFIM, 2006); Vâlcan Mts., Sohodol Gorges (Cheile Sohodol) June 21, 1992, August 5, 1996; July 22-26, 1999 August 11, 2004 (BOBÎRNAC et al., 1999; SERAFIM et al., 2004; SERAFIM, 2006; SERAFIM & CHIMIȘLIU, 2009); Bistrița Gorges (Cheile Bistriței) August 8, 2005 (SERAFIM & CHIMIȘLIU, 2009); Pietrele Albe June 21, 1999 (SERAFIM et al., 2004).

Stictoleptura cordigera (FUESSLY 1775): Schela Cladovei June 12, 1980 (BOTU, 1998); Iron Gates („Porțile de Fier”) (RUCĂNESCU, 1992a); Bucovăț July 05, 2005 (SERAFIM & CHIMIȘLIU, 2009).

Stictoleptura rubra (LINNAEUS 1758): Novaci without other data (SERAFIM, 2006); Crângu June 18, 1951 (SERAFIM et al., 2004); Craiova July 8, 1962, June 6, 1967 (SERAFIM et al., 2004); Rânca October 31, 1963 (SERAFIM et al., 2004); Bulba Valley; Baia de Aramă June 17, 1992, August 24, 1993 (SERAFIM, 2006); Baia de Fier August 5, 1996 (SERAFIM et al., 2004); the Parâng Mts.: Olteț Gorges (Cheile Oltețului) August 24, 1993 (SERAFIM et al., 2004); the Parâng Mts.: Gilort Gorges, Mija Mare Valley, Jiet Valley, Voineasa, Obârșia Lotrului (RUCĂNESCU & PATKO, 1995); Vâlcan Mts., Sohodol Gorges (Cheile Sohodol) August 5, 1992, August 1, 1994, July 22-August 28, 1999, June 28, 2000, August 17, 2002, August 15, 2003, August 4-10, 2004, August 12, 2005 (SERAFIM et al., 2004; SERAFIM & CHIMIȘLIU, 2009); Lotru Mts., Voineasa August 1, 1996 (SERAFIM, 2006); Căineni July 18, 2003 (SERAFIM et al., 2004); Galbenu Gorges (Cheile Galbenului) August 14, 2003, August 13, 2005 (RUCĂNESCU & PATKO, 1995; SERAFIM & CHIMIȘLIU, 2009); Bistrița Gorges (Cheile Bistriței) August 8, 2005 (SERAFIM & CHIMIȘLIU, 2009).

Stictoleptura scutellata (FABRICIUS 1781): Oslea (MARCUS, 1928); Piatra Cloșani (MARCUS, 1928); Mija Mare Valley (RUCĂNESCU & PATKO, 1995); Lotru Mts., Voineasa August 1, 1996 (SERAFIM, 2006); Vâlcan Mts., Sohodol Gorges (Cheile Sohodol) July 22-August 5, 1996, June 21-26, 1999, August 17, 2002, August 15, 2003, August 2-11, 2004 (BOBÎRNAC et al., 1999; SERAFIM et al., 2004; SERAFIM & CHIMIȘLIU, 2009); Pietrele Albe June 21, 1999 (SERAFIM et al., 2004); Bratcu Valley July 6, 2004 (SERAFIM, 2006); Bistrița Gorges (Cheile Bistriței) August 8, 2005 (SERAFIM & CHIMIȘLIU, 2009).

Strangalia attenuata (LINNAEUS 1758): Vâlcea County without other data (SERAFIM, 2006); Slatina June 22 (SERAFIM, 2006); Nicolae Titulescu, Palanca Forest June 23-25, 1980 (SERAFIM, 2006); Ilovița July 2, 1985 (BOTU, 1998); Șimnic June 27, 2005 (SERAFIM & CHIMIȘLIU, 2009); Bucovăț July 5, 2005 (SERAFIM & CHIMIȘLIU, 2009).

Vadonia steveni (SPERK 1835): Craiova June 5, 1964 (SERAFIM et al., 2004).

Vadonia unipunctata (FABRICIUS 1787): Orșova without other data (PANIN & SĂVULESCU, 1961; IENIȘTEA, 1975); Strehaia June 24, 1983 (SERAFIM, 1985, 2006).

Tribe Nelydalini

Nelydalis major (LINNAEUS 1758): Piatra Cloșani (MARCUS, 1928).

Tribe Oxymirini

Oxymirus cursor (LINNAEUS 1758): Craiova May 30, 1960 (SERAFIM, 2005); Novaci July 5, 1962 (SERAFIM et al., 2004); the Parâng Mts., Păpușa Peak July 14, 1962 (SERAFIM et al., 2004); the Parâng Mts., Râncea June 24, 1963 (SERAFIM, 2005); Coșoveni May 14, 2003 (SERAFIM et al., 2004).

Tribe Rhagiini

Akimerus schaefferi (LAICHTING 1784): Ghelmeșioaia June 2, 1972 (SERAFIM, 2005); Gura Văii May 19 - July 4, 1978 (SERAFIM, 2005); Oglănic Valley (RUCĂNESCU, 1992); Iron Gates ("Porțile de Fier") (RUCĂNESCU, 1992a).

Anisorus quercus (GÖTZ 1783): Pietrele Albe June 21, 1999 (SERAFIM et al., 2004).

Cortodera femorata (FABRICIUS 1787): Craiova May 21, 1964, May 20, 1965 (SERAFIM et al., 2004); Strehaia May 12, 1982 (SERAFIM, 1985); Segarcea May 16, 2000 (SERAFIM & CHIMIȘLIU, 2009); Bucovăț May 6, 2003 (SERAFIM et al., 2004).

Cortodera flavimana (WALTL 1838): Craiova May 21-25, 1964, May 20, 1965 (SERAFIM, 1985; SERAFIM et al., 2004); Drobeta-Turnu Severin June 5, 1984 (SERAFIM, 2006).

Cortodera humeralis (SCHALLER 1783): Bucovăț May 9, 1970 (SERAFIM et al., 2004).

Dinoptera collaris (LINNAEUS 1758): Radovan, Panaghia Forest May 15, 1961 (SERAFIM, 1985, 2005); Orșova June 18, 1970 (SERAFIM, 2005); Cerneți May 24, 1985 (SERAFIM et al., 2004); Pietrele Albe May 21, 1999 (SERAFIM et al., 2004); Bucovăț May 18, 1994, May 7, 2000, May 29, 2004 (SERAFIM et al., 2004; SERAFIM & CHIMIȘLIU, 2009).

Evodinellus (Brachytodes) clathratus (FABRICIUS 1792): Eastern Jiu Valley July 1, 1976 (SERAFIM, 2005); Obârșia Lotrului July 23, 1977 (SERAFIM, 2005); the Parâng Mts.: Gilort Gorges, Mija Mare Valley, Jiet Valley, Voineasa Olteț Valley, Obârșia Lotrului (RUCĂNESCU & PATKO, 1995).

Gaurotes (Carilia) virginea (LINNAEUS 1758): Oslea (MARCUS, 1928); Râncea June 31, 1964 (SERAFIM, 2005); Tismana July 26, 1982 (SERAFIM et al., 2004); Târgu Cărbunești July 12, 1984 (SERAFIM et al., 2004).

Grammoptera ruficornis (FABRICIUS 1781): Orșova Veche March 29-April 27, 1969 (NEGRU, 1971).

Pachyta quadrimaculata (LINNAEUS 1758): Vâlcea County without other data (SERAFIM, 2005); Polovragi August 14, 1966 (SERAFIM, 2005); the Parâng Mts.: Mija Valley (RUCĂNESCU & PATKO, 1995).

Pachyta lamed (LINNAEUS 1758): Valley of the Lotru River June 9, 1960 (SERAFIM, 2005).

Pidonia lurida (FABRICIUS 1792): Novaci, Valley of the Gilort river July 5, 1962 (SERAFIM et al., 2004); the Eastern Jiu Valley July 1, 1976 (SERAFIM, 2005); the Parâng Mts.: Gilort Gorges, the Mija Mare Valley, the Jiet Valley, Voineasa, the Olteț Valley, Galbenu Gorges, Obârșia Lotrului (RUCĂNESCU & PATKO, 1995); Pietrele Albe June 21, 1999 (SERAFIM et al., 2004); Segarcea May 16, 2000 (SERAFIM & CHIMIȘLIU, 2009); Bucovăț May 17, 2000 (SERAFIM & CHIMIȘLIU, 2009).

Rhagium bifasciatum (FABRICIUS 1775): Craiova without other data (PANIN & SĂVULESCU, 1961).

Rhagium inquisitor (LINNAEUS 1758): Novaci June 24, 1963 (SERAFIM, 2005).

Rhagium mordax (DE GEER 1775): Craiova June 15, 1952 (SERAFIM et al., 2004); Novaci July 5, 1962 (SERAFIM et al., 2004); Gura Motrului June 20, 1983 (SERAFIM, 1985); Corcoaia Gorges (Cheile Corcoaiei) (RUCĂNESCU, 1997); Vâlcan Mts., Sohodol Gorges (Cheile Sohodol) (BOBÎRNAC et al., 1999); Pietrele Albe June 21, 1999 (SERAFIM et al., 2004).

Rhagium sycophanta (SCHRANK 1781): Oslea (MARCUS, 1928); Giurgița July 6-11, 1960 (SERAFIM, 1985, 2005); Novaci July 5, 1962 (SERAFIM et al., 2004); Craiova April 14, 1967, May 1-12, 1996 (SERAFIM et al., 2004); Schela Cladovei May 12, 1975 (BOTU, 1998); Strehaia May 12, 1982 (SERAFIM, 1985, 2005); Argetoiaia June 25, 1993 (SERAFIM et al., 2004); Golumbu May 30, 1980 (SERAFIM et al., 2004).

Stenocorus meridianus (LINNAEUS 1758): Craiova June 5, 1964 (SERAFIM, 1985); Răcari May 21, 1994 (SERAFIM et al., 2004).

Tribe Xylosteini

Xylosteus spinolae FRIVALDSZKY 1838: Voineasa, 1,340 m and Obârșia Lotrului (RUCĂNESCU & PATKO, 1995).

Subfamily PRIONINAE**Tribe Aegosomatini**

Megopis (Aegosoma) scabricornis (SCOPOLI 1763): Râmnicu Vâlcea without other data (PANIN & SĂVULESCU, 1961); Drobeta-Turnu Severin July 15, 1961, July 19, 1962, August 2, 1964 (SERAFIM, 2005), August 2, 1971, July 16, 1975 (BOTU, 1998); Craiova without other data (PANIN & SĂVULESCU, 1961); Râmnicu Vâlcea without other data (PANIN & SĂVULESCU, 1961); Craiova July 24, 1964, July 18, 1973, July 2, 1997 (SERAFIM, 1985; SERAFIM et al., 2004); Cerneți July 24, 1967 (BOTU, 1998); Eșelnița August 12, 1969 (SERAFIM, 2005); Slatina-Strehareț Forest July 25, 1980 (SERAFIM, 1985); Bechet August 5, 1982 (SERAFIM, 1985); Ciupercenii Noi August 6, 1982 (SERAFIM, 1985); Dubova August 8, 1984 (BOTU, 1998); Negoii July 14, 1994 (SERAFIM et al., 2004); Sohodol Gorges (Cheile Sohodol) August 8, 1995 (SERAFIM et al., 2004). LC (NIETO & KEITH, 2010).

Tribe Prionini

Prionus coriarius (LINNAEUS 1758): Căineni July 28, 1951 (SERAFIM, 2005), July 18, 2003 (SERAFIM et al., 2004); Predești July 12, 1952 (SERAFIM et al., 2004); Bumbăști August 3, 1955 (SERAFIM et al., 2004); Polovragi July 14, 1966 (SERAFIM, 2005); Novaci, Valley of Gilort river August 13, 1967, August 26, 1970 (SERAFIM et al., 2004; SERAFIM, 2005); Ogradena August 12, 1969 (SERAFIM, 2005); Călimănești July 9, 1970 (SERAFIM, 2005); Râmnicu Vâlcea July 26, 1970, July 10, 1975 (SERAFIM, 2005); Breznița July 7, 1971 (SERAFIM, 2005); Bălănești July 2, 1977 (SERAFIM et al., 2004); Ostrovul Mare July 10, 1979 (SERAFIM, 2005); Gura Văii July 28, 1979 (SERAFIM, 2005); Slatina, Strehareț Forest July 25, 1980 (SERAFIM, 2005); Malovăț July 13, 1981 (BOTU, 1998); Gura Motrului August 3, 1981, June 21, 1983 (SERAFIM, 1985, 2005); Bechet August 5, 1982 (SERAFIM, 1985, 2005); Ciupercenii Noi August 6, 1982 (SERAFIM, 2005); July 18, 2003 (SERAFIM et al., 2004); Straja 9, 1990 (SERAFIM et al., 2004), June 4, 2004 (SERAFIM & CHIMIȘLIU, 2009); Oltenia region August 18, 1991 (SERAFIM, 2005); Racovița August 11, 1992 (SERAFIM et al., 2004); Vâlcan Mts., Sohodol Gorges (Cheile Sohodol) August 5, 1992, July 25-August 28, 1999, August 9, 2003, August 9, 2004 (SERAFIM et al., 2004); Valea de Pești August 9, 1992 (SERAFIM et al., 2004); Balș July 4, 1997 (SERAFIM et al., 2004); Olănești 5, 2002 (SERAFIM et al., 2004); Craiova August 3, 2002 (SERAFIM et al., 2004); Târgu Cărbunești July 12, 2003 (SERAFIM et al., 2004); Valley of Jiu river July 7, 2004 (SERAFIM, 2005); Vineți, Spineni July 8, 2004 (SERAFIM, 2005); Galbenu Valley August 8-14, 2005 (CHIMIȘLIU, 2007). LC (NIETO & KEITH, 2010).

Subfamily SPONDYLIDINAE**Tribe Anisarthronini**

Anisarthron barbipes (SCHRANK 1781): Alion hill near Orșova, (FRIVALDSZKY, 1865), Orșova without other data (KUTHY, 1900).

Tribe Asemini

Arhopalus rusticus (LINNAEUS 1758): Drobeta-Turnu Severin July 27, 1963 (SERAFIM, 2007); Craiova May 5-July 10, 1964, July 10, 1966 (SERAFIM et al., 2004; SERAFIM, 2007); Gârla Mare June 29, 1964 (SERAFIM, 1985, 2007); Straja August 9, 1990 (SERAFIM et al., 2004); Voineasa August 1, 1996 (SERAFIM, 2007); Șimnic June 23, 2007 (SERAFIM & CHIMIȘLIU, 2009).

Asemum striatum (LINNAEUS 1758): Oglănic Valley (RUCĂNESCU, 1992).

Tetropium castaneum (LINNAEUS 1758): Craiova May 30, 1960 (SERAFIM, 1985, 2007); Rânca, the Parâng Mts. July 18-August 1, 1964 (SERAFIM, 2007); Obârșia Lotrului spruce fir Forests (RUCĂNESCU & PATKO, 1995); Voineasa (RUCĂNESCU & PATKO, 1995).

Tetropium fuscum (FABRICIUS 1787): Voineasa resort August 1, 1996 (SERAFIM, 2007).

Tribe Saphanini

Saphanus piceus piceus (LAICHTING 1784): Cloșani (MARCUS, 1928); Cernișoara (RUCĂNESCU, 1997); Craiova May 23, 2006 (SERAFIM & CHIMIȘLIU, 2009); Șimnic June 23, 2004, June 1, 2007, June 15, 2008 (SERAFIM & CHIMIȘLIU, 2009).

Tribe Spondylidini

Spondylis buprestoides (LINNAEUS 1758): Călimănești and Craiova (PANIN & SĂVULESCU, 1961).

RESULTS AND DISCUSSIONS

The species were reported from 202 collection sites located in five counties of Oltenia: Dolj (62 sites), Mehedinți (56 sites), Gorj (37), Valcea (25 sites), Olt (22 sites).

156 species of longhorn beetles are presented. They belong to 5 subfamilies, 37 tribes, and 86 genera as it follows: Cerambycinae (13 tribes, 25 genera and 48 species), Lamiinae (13 tribes, 25 genera and 53 species), Lepturinae (5 tribes, 28 genera and 46 species), Prioninae (2 tribes, 2 genera and 2 species), Spondylidinae (4 tribes, 6 genera and 7 species).

5	PRIONINAE	2	2	2
	Total	37	86	156

Common species of cerambicids have been reported from the fauna of Oltenia, as well as rare species, some protected, of community and national interest.

Special faunistic elements

In 1961, in the fauna fascicle (PANIN & SĂVULESCU, op.cit.), the authors anticipated the presence of *Akimerus schaefferi* in Romania. Its presence in the Romanian fauna was confirmed by ANDRIESCU in 1972, who recorded it at Pălinoasa (Suceava County). The species was found later on by Ph.D. Nicolae Săvălescu, in Mehedinţi County, at Ghelmeşioaia, in 1972, and at Gura Văii, in 1978 (SERAFIM, 2005). In 1992, RUCĂNESCU found the species in Oglănic Valley, the Botanical Reserve downstream Gura Văii.

Pedostrangalia revestita, a very rare species, is distributed in Europe and in Transcaucasia. In Romania, it was reported at Dumbrava, Haţeg, Baia Mare, Braşov, Băile Slănic, the Cindrel (Cibin) Mountains (PANIN & SĂVULESCU, op.cit), Măzăneşti (ANDRIESCU, 1972), Craiova (SERAFIM, 1985), Bodi Ferneziu (SERAFIM, 2006).

Stictoleptura cordigera (FUESSLY) is reported in Dobrogea (Măcin, Oltina, Băneasa-Canaraua Fetii), at Ileana and Pasărea Forest (Ilfov County), Comana Forest (Giurgiu County) (PANIN & SĂVULESCU, 1961), Schela Cladovei (BOTU, 1998); Iron Gates ("Porţile de Fier") (RUCĂNESCU, 1992a); Bucovăţ (SERAFIM & CHIMIŞLIU, 2009). It is distributed in Southern and Central Europe, the Balkan Peninsula, Turkey, the Caucasus, Transcaucasia, Iran, the Near East.

Cerambyx cerdo (Plate I, Fig. 1) is the single species of the genus *Cerambyx* with protection status in Romania and Europe. In Romania, *C. cerdo* coexists with *C. scopoli*, *C. miles*, *C. nodulosus*, and *C. welensii*.

In Romania, *Cerambyx miles* (Plate I, Fig. 2) was reported at Orşova (CSIKI, 1904); Băile Herculane, Cleanov, Apold, Sibiu, Piteşti (PANIN & SĂVULESCU, op.cit.), Comana Forest, Pasărea Forest (SERAFIM, 1985), Racoviţa, Bucovăţ, Leamna (SERAFIM et al., 2004). It occurs in Southern, Central and Eastern Europe, the Near East, the Caucasus, Transcaucasia.

Cerambyx nodulosus (Plate I, Fig. 3) is distributed in South-Eastern Europe and the Near East. In Romania, it appears only in Banat: Băile Herculane and Cireşu.

Cerambyx welensii (Plate I, Fig. 4) occurs in Southern, Central and Eastern Europe, the Near East, the Caucasus, North Africa. In Romania, it is reported at Băile Herculane, Ineu (PANIN & SĂVULESCU, op.cit.), Oglănic

Valley (RUICĂNESCU, 1992), Bucovăț, Leamna (SERAFIM et al., 2004); Gura Văii, Balota, Canaraua Fetii (SERAFIM, 2010).

Oplosia cinerea, a rare species, is distributed in Europe and the Near East. In Romania, it was reported at Băile Herculane, Sibiu, Brașov, the Retezat Mountains – Gura Zlata (PANIN & SĂVULESCU, 1961) and Pietrele Albe – Valley of the Jiu river (SERAFIM et al., 2004).

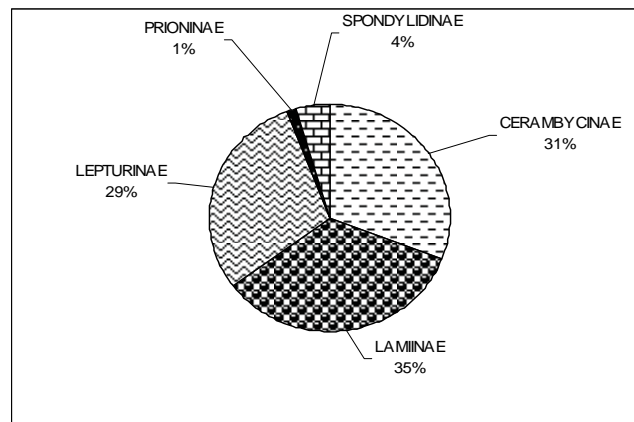

Figure 2. Percentage rates of subfamilies.
Figura 2. Ponderea procentuală a subfamiliilor.

Agapanthia cynarae (Plate II, Fig. 1) was cited by CSIKI (1905) at Plavișevița, by RUICĂNESCU (1992) at Oglănic Valley, the Iron Gates, BOTU (1998) at Gura Văii and Schela Cladovei, from the Danube Clisura (Oreva and Slătinic) (SERAFIM, 2010). The species occurs in Southern and South-Eastern Europe.

Gracilia minuta is one of the smallest European longhorn beetles. In Romania, the species was mentioned by PETRI (1925-1926) at Sibiu. Very few records for Romania. In Oltenia it was found in Craiova (SERAFIM et al., 2004) and Eșelnița (SERAFIM, 2009).

In Romania, the species *Pilemia tigrina* (Plate II, Fig. 3) is reported at Baziaș (CSIKI, 1905a); Dej, Geaca, Zau de Câmpie (PETRI, 1912), Deva (PANIN & SĂVULESCU, 1961), Dealul lui Dumnezeu, Mârzești, “Valea lui David” Reserve, the Natural Park “Grădiștea Muncelului-Cioclovina”, the Natural Park “Iron Gates”, Ineu (TATOLE et al., 2009); Dumbrăveni Forest (SERAFIM, 2010).

Herophila tristis (Plate II, Fig. 4) is a Southern and Central European species. It is reported only at Băile Herculane (PANIN & SĂVULESCU, op.cit.; RUICĂNESCU, 1997) and Oglănic Valley, the Iron Gates Natural Park (RUICĂNESCU, 1992).

Neodorcadion exornatum, a rare species in Romania (especially in the Dobruđa), is also distributed in Bulgaria, European Turkey, Greece. It was found at Vârvoru de Jos (SERAFIM, 2010) (Plate II, Fig. 5).

Regarding species *Chlorophorus glabromaculatus* we think it is a confusion with *Chl. herbstii*, *Chlorophorus glabromaculatus* occurs in Western and Central Europe.

Saperda quercus occurs in Bosnia and Herzegovina, Bulgaria, European Turkey, Greek mainland, former Yugoslavia (Incl. Serbia, Kosovo, Voivodina, Montenegro), the Near East. Its presence in Romanian fauna has to be confirmed.

We should mention the species with protection regime:

Referring to IUCN (the International Union for the Conservation of Nature) Red List 2010 of Threatened Species, *Cerambyx cerdo* is included into Vulnerable category (VU).

The species *Cerambyx cerdo*, *C. miles*, *C. nodulosus*, *C. scopolii*, *C. welensii*, *Ropalopus insubricus* (Plate II, Fig. 2), and *Saperda punctata* were included in the European Red List of Saproxylic Beetles (NIETO & KEITH, 2010) into Near Threatened category (NT).

According to IUCN status of conservation, *Rosalia alpina* and *Morimus asper funereus* were included into Vulnerable category (VU).

Pilemia tigrina, *Cerambyx cerdo*, *Morimus asper funereus*, *Rosalia alpina* and *Pseudogaurotina excellens* were included in the list of Natura 2000 species from Romania (TATOLE et al., 2009).

CONCLUSIONS

As it can be remarked in the bibliographical list, the longicorn beetle fauna of Oltenia is relatively well known. (of the 252 known species in the fauna of Romania, in the fauna of Oltenia 156 species have been mentioned so far, representing 61.90% of the fauna of cerambicids of Romania).

Most species belong to the subfamily Lamiinae (53 species) followed by the subfamilies: Cerambycinae (48 species), Lepturinae (46 species), Spondylidinae (7 species), and Prioninae (2 species).

In the study area, there are some endangered species, they being important from the conservation point of view: *Cerambyx cerdo*, *C. miles*, *C. nodulosus*, *C. welensii*, *Morimus asper funereus*, *Pilemia tigrina*, *Ropalopus insubricus*, *Rosalia alpina*, *Saperda punctata*.

Considering the great diversity of ecosystems in Oltenia and the fact that in Oltenia no systematic studies have been undertaken on this group of beetles, it is possible that the number of species of cerambicids in this area to be greater.
