

AUXILIARY DEPLOYMENT IN THE REIGN OF TRAJAN

PAUL A. HOLDER

Introduction

The Roman legal document today called a diploma is a personal copy of the bronze original fixed to a wall at Rome which conferred a number of privileges on the soldiers named in the constitution.¹ Each auxiliary diploma contains a list of units based in the named province which had men eligible for the grant. Thus each list is a snapshot of all, or part, of the garrison of the province on the day the constitution was promulgated. If a group of such snapshots exists for different provinces within the reign of a single emperor then a pattern of deployment might be discerned throughout the empire. In recent years the rapid increase in finds of diplomas means that there is now a greater number of dated auxiliary constitutions for the period between 70 and 166.² In 2003, with about 10% of Hadrianic and Antonine constitutions identified, it was possible to attempt to enumerate the auxiliary units in Hadrian's reign and to outline their deployment.³ Since then some significant Trajanic constitutions have come to light. Therefore it seems worthwhile to prepare a paper on auxiliary deployment in the reign of Trajan in celebration of the 1900th anniversary of the foundation of the province of Dacia.⁴ The methodology employed in the previous paper has largely been replicated and corrections have been made where necessary. Thus the information provided by diplomas has been set out in tabular form and where necessary dated inscriptions and papyri have been used to fill out the picture. In general each of the tables has been divided into three columns with the central one containing detailed evidence for Trajan's reign. Relevant earlier and later citations are listed in the columns on either side. As a starting point for tracing deployment over this period of time a specific unit list has been marked out following the order recorded in that diploma issue. Around this is built all other information for unit movements into and out of individual provinces. Such moves are highlighted in bold with the name of the province from which it came abbreviated to no more than three letters and the province to which it moved shortened to no less than five letters.

Moesia inferior

After the wars of Domitian the key provinces for the deployment of auxiliary forces had become those on the lower Danube. Thus it is sensible to start this survey with Moesia inferior where a large number of complete constitutions or nearly complete ones have come to light in the last few years which

¹ There are three principal collections of diplomas. *Corpus Inscriptionum Latinarum* (CIL) XVI published 1936 and 1955; *Roman Military Diplomas* (RMD) of which five volumes have been published between 1978 and 2006; and B. Pferdehirt, *Römische Militärdiplome und Entlassungsurkunden in der Sammlung des Römisch-Germanischen Zentralmuseums*, Mainz, 2004 (RGZM).

³ P. A. Holder, *Auxiliary deployment in the reign of Hadrian*, in J. J. Wilkes (ed.), *Documenting the Roman army: essays in honour of Margaret Roxan*, London, 2003, p. 101-145.

⁴ For a general survey of unit movements under Trajan, see D. J. Knight, „The movements of the auxilia from Augustus to Hadrian”, *ZPE* 85, 1991, p. 189-208.

expand our knowledge of the garrison early in the reign of Trajan (TABLE 1).⁵ Perhaps the most important are those which reveal there were three parallel constitutions of 13 May 105 which named a total of nine *alae* and twenty one cohorts. This seems to represent the total garrison of the province at that date.⁶ Yet it is possible that *cohors I Germanorum* may have been there at this time but without men eligible for the grant.⁷ All of the *alae* and all but three of the cohorts are attested in the province prior to Trajan's reign. However, it is most likely that *cohors II Flavia Brittonum*; *cohors I Augusta Nerviana Pacensis milliaria Brittonum*; and *cohors II Brittonum Augusta Nerviana Pacensis milliaria* had arrived before 105 but had no men eligible to be named on any of the surviving constitutions.

The new diploma evidence also reveals that two units in Moesia inferior in the reign of Domitian were in Cappadocia in 101. Indeed *ala I Claudia Gallorum* had been transferred after 97 and had returned to Lower Moesia by 105. On the other hand *cohors I Raetorum* had moved from the province after 92 and did not return. It is clear that the *ala* moved only temporarily perhaps to replace units or a vexillation from Cappadocia which had been withdrawn by Trajan for the First Dacian War.⁸ A similar case can be made for *cohors I Raetorum* but in this instance it did not return. The use of units based in Moesia inferior as temporary replacements in wartime occurred again later in Trajan's reign. A cavalry vexillation from the province was amalgamated with one from Dacia for service in Parthia under the command of L. Paconius Proculus.⁹ This was probably made up from cavalrymen from a number of units which meant whole units could be transferred temporarily to other provinces. Thus *ala I Flavia Gaetulorum* is attested in Pannonia inferior in 114 and 113 or 115 but had returned to Moesia inferior by 125 at the latest. Similarly *ala I Pannoniorum* is attested in Dacia in 113/114 and had also returned by 125. In the case of *cohors II Brittonum Augusta Nerviana Pacensis milliaria*, recorded in Pannonia inferior in 114, the transfer became permanent and it became part of the garrison of Dacia Porolissensis.

That the garrison was little changed into the reign of Hadrian can be seen by the number of units from Moesia inferior which became the initial garrison of Dacia inferior when it was separated from the province. Of the nine *alae*, *ala I Asturum*; *ala I Claudia Gallorum Capitoniana*; and *ala Gallorum Aetorigiana* became part of the garrison of Dacia inferior. *Ala Hispanorum* is attested in Dacia superior in 119, perhaps temporarily, before moving to Dacia inferior in place of *ala Gallorum Aetorigiana* which had returned to Lower Moesia by 127. The other five remained in the province although *ala Gallorum Flaviana* was transferred to Moesia superior by 132/133.¹⁰ It is a similar picture for the cohorts. Ten became the garrison of Dacia inferior although *cohors I Ubiorum* was later moved to Dacia superior. The others presumably became the garrison of Moesia inferior, although it is possible that *cohors VII Gallorum* had participated in Trajan's Parthian Wars and had remained in Syria where it is first attested in 127/136.¹¹ It is now clear that *cohors I Sugambrorum tironum* was still in Moesia inferior in 116 but it had been moved to Syria by 153.¹²

⁵ For more details about individual units see Fl. Matei-Popescu, „Trupele auxiliare Romane din Moesia inferior”, SCIVA 52-53, 2001-2002, 173-242; and Fl. Matei-Popescu, „Participarea trupelor auxiliare din Moesia inferior la războaiele Dacice”, Argeșis ser. Ist. 13, 2004, p. 123-129. *Cohors I Cantabrorum* and *cohors VIII Gallorum*, attested in Moesia on diplomas of 75 and 78, have been omitted from this paper because there is no later evidence for them.

⁶ *Cohors II Bracaraugustanorum*, in Moesia inferior in 92, was probably in Thrace by this date along with *cohors II Flavia Numidarum* which may have been in Moesia inferior earlier along with *cohors I Flavia Numidarum*. A new diploma shows that the Numidians were back in Lower Moesia by 116 (W. Eck, A. Pangerl in this volume, p. 101-105).

⁷ The career of C. Aetius Naso is of Domitianic date (PME I, IV A 95). After he commanded a *cohors I Germanorum* he became tribune of *legio I Italica* in Moesia inferior. It is possible the cohort was in the same province.

⁸ See below under Cappadocia and note 92.

⁹ PME II, IV, V P 5.

¹⁰ The diploma was originally dated to 132 (RMD IV 247) but it is now clear that the consuls cannot be so closely dated. The date of issue is therefore 132/133 (RMD V Further notes 12*†247).

¹¹ There have been a number of suggestions for the date and for the province of this diploma (CIL XVI 103). In the light of recent discoveries it can now be accepted as a diploma for Syria with a date of 127/136 (RMD V Further notes 18*103).

¹² *Cohors IIII Gallorum* moved from Thrace to Cilicia after 114 but before 121.

Moesia superior

The next provincial garrison to be considered is that of Moesia superior where three *alae* and twenty-one cohorts are named on the diploma of 8 May 100 (TABLE 2).¹³ This total represents most of the garrison for, at most, five cohorts are also attested in the province in the reign of Trajan which could have been there in 100. *Cohors I Brittonum milliaria* and *cohors I Britannica milliaria c.R.* are named in 105 but their previous diploma attestation is on the diploma of 85 for Pannonia. *Cohors III Campestris c.R.* and *Cohors IIII Cypria c.R.* are both listed on the constitution of 103/105. The latter is recorded on a tombstone of earlier date from Bithynia; indeed the former may also be recorded in that province if it is the same as a *cohors camp(...)* on a tombstone found at Amastris.¹⁴ Finally there is the enigmatic *cohors III Augusta Nerviana [Brittonum milliaria?]* recorded as *translatis in expediti[one]* in 115 with an *ala* and probably seven other cohorts.¹⁵

Of the units on the diploma of 100 the three *alae*, *ala praetoria (singularium)*; *ala I Claudia nova*; and *ala II Pannoniorum*, were in Moesia superior before the death of Domitian. The evidence is the same for vast majority of the cohorts. Only *cohors I Vindellicorum milliaria c.R. (pf)* and *cohors II Brittonum milliaria c.R. pf* definitely arrived in Trajan's reign since both were in Germania inferior on 20 February 98. Four more cohorts arrived early in Trajan's reign but after 8 May 100. *Cohors I Pannoniorum veterana* and *cohors I Hispanorum* were transferred from Lower Germany after 13 March 101; *cohors VIII Raetorum c.R.* arrived after 19 November 102 from Pannonia; and *cohors I Alpinorum* is attested in Britain on 19 January 103 and then in Moesia superior on the constitution of 103/105.

Once the province of Dacia had been established two of the three *alae* and eighteen of the thirty cohorts became part of the garrison of that province (TABLE 4). *ala praetoria singularium* and twelve of the cohorts can be restored on a diploma for Moesia superior of 115. Of these the *ala* and apparently eight cohorts are recorded as '*translatis in expediti[one]*'.¹⁶ Clearly they had been withdrawn to participate in Trajan's Parthian Wars. The *ala praetoria singularium* apparently did not return but became part of the garrison of Syria. Only *cohors V Hispanorum* definitely returned to Moesia superior for the *cohors I Montanorum* recorded in the province in 132/133 may be the one recorded in Dacia in 109 rather than the one on the diploma of 115. One of these two should be equated with the *cohors I Montanorum* named on the diploma for Syria Palaestina of 136/137.¹⁷ *Cohors I Thracum Syriaca* and *cohors I Cilicum* (if correctly restored on the diploma of 115) are next recorded in Moesia inferior while *cohors I Cisipadensium* was in Thrace by 138. The presence of *cohors VII Breucorum c.R.* in the Parthian Wars is probably confirmed by a tombstone from Gordion.¹⁸ By 143 it was in Pannonia inferior. *Cohors IIII Raetorum* may not have left the eastern provinces after Trajan's death since it was part of the garrison of Cappadocia by 135. Nothing further is yet known about *cohors III Augusta Nerviana [Brittonum milliaria?]*.

¹³ For further details about individual units in the province in Trajan's reign, see W. Eck, A. Pangerl, „Traians Heer im Partherkrieg. Zu einem neuen Diplom aus der Jahr 115“, Chiron 15, 2005, p. 49-67; and Fl. Matei-Popescu, O. Țentea, Participation of the auxiliary troops from Moesia Superior in Trajan's Dacian War (in this volume, p...).

¹⁴ AE 1993, 1429. The lack of numeral and epithet *civium Romanorum* on this tombstone are not an impediment to the identification since *cohors IIII Cypria c. R.* is recorded without numeral and epithet on the tombstone from Sinope: M. P. Speidel-D. M. French, „Bithynian troops in the Kingdom of the Bosphorus“, EpAnat 6, 1985, p. 97-102).

¹⁵ This is its only record, at present. It seems sensible to restore *Brittonum* on the analogy of a first and second cohort of Britons with the same titles. It would also explain why *cohors III Brittonum*, also in Moesia superior, is recorded with the epithet *veterana* since it was an older foundation.

¹⁶ The names of seven cohorts can readily be supplied. The restoration of *cohors I Cilicum* is not so certain.

¹⁷ It is now possible to identify three units called *cohors I Montanorum* in the reign of Trajan. The cohort on the diploma of 115 can be traced back to 96 in Moesia superior and earlier than this the diploma evidence is incomplete. Another *cohors I Montanorum* is attested in Noricum in 79 and is presumably the one first recorded in Pannonia in 85 and then on one of the parallel constitutions of 98 (RMD II 81); while the third was in Pannonia at least from 80 and is recorded on the other grant of 98 (TABLE 3). Also from 98 there is a building dedication from Novae in Moesia superior with the *cohors I Montanorum* from Moesia (AE 1976, 609).

¹⁸ A. L. Goldman, „A New Military Inscription from Gordion“, Anadolu Meden Müzesi 1996, Yilligi, 1997, p. 45-56.

Pannonia

The province of Pannonia was divided by Trajan into Pannonia superior and Pannonia inferior in 106. The two are, however, treated together but with two columns for his reign to show the evidence for auxiliary units before and after the creation of the province of Dacia. The strength of the garrison prior to the division is not certain because the evidence is only partial (TABLE 3).¹⁹

The names of five *alae* are known from Trajanic diplomas for the undivided province. *Ala I Flavia Augusta Britannica milliaria c.R.* is recorded earlier in the province on tombstones, while *Ala Frontoniana*; *ala Siliana*; *ala I Augusta Ituraeorum*; and *ala I (Hispanorum) Arvacorum* are known from Domitianic diplomas. In addition *ala praetoria* is named on diplomas of 85 and 110 in the province. *ala I civium Romanorum* is named on the Domitianic diplomas then is next recorded on the diploma of 109 for Dacia but it is likely it was still in Pannonia up to the creation of that province. There is also *ala I Britannica c. R.* in Dacia in 110 which is apparently recorded as *ala I Brittonum* on a diploma of 71 which can be assigned to Pannonia.²⁰ Four *alae* were added to the garrison in the reign of Trajan but all are first attested on diplomas after the division of the province. *Ala I Hispanorum Campagonum* moved from Britain after 98 and is next recorded in 114 in Pannonia inferior and *ala I Batavorum milliaria c. R. pf* in Pannonia superior in 112 was still in Lower Germany in 101. *Ala I Cannanefatium* left Upper Germany after 90 and had arrived in Pannonia superior by 113 while *ala I Bosporanorum* had arrived in that province from Syria by 112.²¹ To these twelve *alae* can be added *ala I Ulpia contariorum milliaria* which was raised by Trajan and is recorded on a diploma for the first time in 112, and *ala I Thracum veterana* whose early history before being listed on the same document is unclear.²² From this total *ala I Augusta Ituraeorum*; *ala I Brittonum/Britannica c.R.*; and *ala I civium Romanorum* had been removed before the death of Trajan and all are found in Dacia. Three more are next attested in Dacian provinces. *Ala Frontoniana* is in Dacia Porolissensis in 133; and *ala I Batavorum milliaria c. R. pf* and *ala I Bosporanorum* are in Dacia superior in 136/138. When they were transferred is unclear but it may not have been until Hadrian's reign. This is because *ala Siliana c.R.* and *ala I Hispanorum Campagonum* are both attested in Pannonia inferior in 119 before being moved respectively to Dacia Porolissensis by 133 and to Dacia superior by 136/138.

The evidence for the cohorts is more complete. Ten are directly attested in the undivided province and four more can be surmised. This is because *cohors I Alpinorum*; *cohors I Noricorum*; *cohors II Asturum et Callaecorum*; and *cohors V Callaecorum Lucensium* are named on Domitianic diplomas for the province and on others after the division. To these can be added three citizen cohorts not recorded on diplomas until the reign of Hadrian.²³ *Cohors IIII voluntariorum* and *cohors XVIII voluntariorum* were apparently in Pannonia before it was divided. *cohors I Campanorum* is recorded in Pannonia inferior in Trajan's reign after a transfer from Dalmatia, but it, too, may have arrived before the division. Two cohorts, *cohors I Thracum c.R. pf* and *cohors III Lusitanorum pf*, were moved from Lower Germany to Pannonia inferior after 101 but by 110. *Cohors I Ulpia Pannoniorum milliaria* was a Trajanic creation and may have been stationed in the province soon after like *ala I Ulpia contariorum milliaria* but it is first named on a diploma of 126. Finally *cohors II Augusta Nerviana Pacensis Brittonum milliaria* is recorded in Pannonia inferior in 114 having been in Moesia inferior in 105. This may, however, have only been a temporary transfer as with *ala I Flavia Gaetulorum* although it is next named on a diploma of 130/131 for Dacia Porolissensis rather than in Lower Moesia. Indeed of the twenty-one cohorts attested in Pannonia in

¹⁹ For more information about individual units, see B. Lörincz, *Die römischen Hilfstruppen in Pannonien während der Prinzipatszeit. Teil I: Die Inschriften*, Wien, 2001.

²⁰ It now seems that the title *Britannica* on the diploma of 110 for Dacia is not correct because an *ala I Brittonum c. R.* had just been transferred from Dacia superior to Dacia Porolissensis by 14 April 123 (RGZM 22). It is also recorded there on 10 August 123 and the recipient of the Gherla copy of this constitution (RMD I 21) logically should have been a cavalryman in this *ala* rather than in the cavalry unit in Pannonia inferior (contra B. Lörincz (n. 19) 17).

²¹ While it has been suggested that *ala I Cannanefatium* arrived in Pannonia in the reign of Domitian this is by no means certain. On the other hand *ala I Bosporanorum* may have moved from Syria either in Domitian's or in Trajan's reign. See P. A. Holder, *Alae in Pannonia and Moesia in the Flavian period*, in Z. Visy (ed.), *Limes XIX: Proceedings of the XIXth International Congress of Roman Frontier Studies*, Pécs, 2005, p. 79-83.

²² *ala I Flavia Gaetulorum* is not included in this discussion since its presence in Pannonia inferior was as a temporary replacement for *ala I Flavia Augusta Britannica milliaria c.R.* when it served in the Parthian Wars.

²³ Cf. the citizen cohorts in Germania inferior which are not recorded on diplomas until 152 (TABLE 7).

Trajan's reign a further six are known to have left at some time before the death of Hadrian. *Cohors VIII Raetorum* c.R. was in Moesia superior by 103/105 and *cohors I Augusta Ituraeorum* and a *cohors I Montanorum* were in Dacia by 109. The *cohors V Gallorum* in Pannonia inferior seems best equated with the cohort in Britain in 122 and later.²⁴ It may therefore have left the province before Trajan's death. In 112 *cohors I Batavorum milliaria* c. R. pf and *cohors II Batavorum milliaria* c. R. pf are listed on the constitution for Pannonia superior of 112 and both can be restored on that of 116. By 130/131 the former had been transferred to Dacia Porolissensis and by 132/133 the latter was in Noricum.

There is little to be said about the garrison of Dalmatia in Trajan's reign. *Cohors III Alpinorum* and *cohors VIII voluntariorum* are named on the diploma of 94 and remained in the province. At some time in the first century *cohors I Belgarum* had been transferred from Germania superior to Dalmatia. This meant a garrison of three cohorts early in the second century.²⁵

Dacia

There are three constitutions for auxiliary units in Dacia for 109 and 110 which provide a picture of the garrison of the newly created province. A total of six *alae* and twenty-two cohorts are named (TABLE 4).²⁶ *Cohors I Alpinorum* is named on the diploma of 114 having been in Moesia superior in 103/105 while *cohors III Hispanorum* is listed on a diploma for Moesia of 75 but nowhere else until it can be restored on the diploma of 136/138 for Dacia superior.²⁷ The other two, *cohors I Thracum sagittaria* and *cohors I Cannanefatium*, are not yet attested prior to their respective appearances in Dacia superior in 136/138 and Dacia Porolissensis in 130/131.

Of the units definitely in Dacia in 109 and 110 all but four can be traced back to being part of the garrison of Danubian provinces prior to the creation of the province. There is no trace of *ala I Flavia Commagenorum sagittaria* before 109 and, currently, no trace afterwards. Its existence has therefore been questioned especially because of the confusion of its numeral on the diploma, but more diplomas are being discovered with similar 'unique' units.²⁸ *Cohors II Gallorum Pannonica* and *cohors V Lingonum* have not yet been recorded prior to 109 and 110 but it seems reasonable to assume that the former had been based in Pannonia because of its epithet and that the latter had been in Britain with the four other cohorts of Lingones (TABLE 8). The fourth unit, *cohors I Ituraeorum*, is perhaps to be equated with the *cohors I Ituraeorum* recorded in Cappadocia as *milliaria* in 101 and as *sagittaria* in 135.²⁹ The antecedents of the other units are clear. *Ala II Pannoniorum veterana* and *ala I Claudia (nova)* had been stationed in Moesia superior along with seventeen of the cohorts. The other three *alae* and two cohorts had been in Pannonia.

Not all of these units remained in the Dacian provinces created by Hadrian after the Parthian Wars and the upheavals on the Lower Danube in the early years of his reign. *Ala I Claudia (nova)* is next listed on the diploma of 132/133 for Moesia superior with the additional title *miscellanea*.³⁰ *Ala I civium Romanorum* and *ala I Augusta Ituraeorum* next appear in Pannonia inferior on the diploma of 135 but there is not yet a diploma for the province with a full list of units from earlier in Hadrian's reign. Of the cohorts six are attested in Moesia superior in 132/133 but *cohors II Gallorum Macedonica* is known to have been in Dacia Porolissensis in 123 and *cohors V Gallorum* was apparently in Dacia superior in 119. So the timing of these moves is not certain. *Cohors I Thracum* c.R. can be traced to Pannonia superior in 126 and, as suggested, *cohors I Ituraeorum*, moved back to Cappadocia. Finally *cohors IV Cypria* c.R. has not yet left any certain trace after 110.

²⁴ See below under Britannia.

²⁵ For more information about the units, see G. Alföldy, *Die Auxiliartruppen der Provinz Dalmatien*, in *Römische Heeresgeschichte: Beiträge 1962-1985*, Amsterdam, 1987, p. 239-297.

²⁶ For fuller details about the units, see C. C. Petolescu, *Auxilia Daciae: contribuție la istoria militară a Daciei romane*, București, 2002.

²⁷ In the original publication the numeral was read as]ET III HISP (B. Pferdehirt, RGZM 2004, (n. 1) 6-8 and Taf. 1). It is also possible to read these letters as]T IIII HISP.

²⁸ For example, *cohors III Aug(usta) Nerv(iana) [Brittonum milliaria?]* recorded on a diploma for Moesia superior of 115 (TABLE 2).

²⁹ While the unit on the Dacian diplomas is not recorded as milliary stamped tiles of a milliary *cohors I Ituraeorum* have been discovered in Dacia. See O. Țentea, *Cohors I Ituraeorum sagittariorum equitata milliaria*, in L. Ruscu and others (eds.), *Orbis antiquus: studia in honorem Ioannis Pisonis*, Cluj-Napoca, 2004, p. 806-815.

³⁰ A tombstone from Galatia almost certainly relates to its participation in Trajan's Parthian Wars (CIL III 13635) and it may have been posted to Upper Moesia rather than Dacia on its return.

Raetia and Noricum

So far there are three diplomas for Raetia from the reign of Trajan of which the earliest is of 107.³¹ Their combined lists give the appearance of a settled garrison not affected on a permanent basis by the wars waged by Trajan (TABLE 5).³² Hence its continuity into Hadrian's reign and beyond with the exception of *cohors III Batavorum milliaria* which had moved to Pannonia inferior by 135. But the earlier history of the units is more complex. *Ala I singularium c.R. pf* is attested in Germania superior in 90³³ and *ala II Flavia milliaria* had moved to the province a little earlier but after 20 September 82 when it is listed as *ala II Flavia gemina*.³⁴ *Ala I Augusta Thracum* is likely to have been in Raetia longer since it is not recorded anywhere after being in Syria no later than the early Flavian period. Similarly *ala I Hispanorum Auriana* probably moved to Raetia from Pannonia early in the Flavian period rather than later.³⁵ The final *ala* of the Hadrianic garrison is called *ala I Flavia Gemelliana* in 138,³⁶ but on the diploma of 122/124 an *ala Gemelliana* is clearly listed.³⁷ Therefore it seems plausible that these are the same and are identical with the *ala Gemelliana* named on the constitution of 15 June 64 rather than that the latter is the same as *ala Gemelliana* attested in Mauretania Tingitana from 88 (TABLE 9).

The earlier histories of the cohorts are also not as straightforward. Only two cohorts, *cohors I Raetorum* and *cohors III Gallorum* are directly attested in Raetia before the reign of Trajan. A third, *cohors III Britannorum*, is named on a tombstone from Cunei in Northern Italy as part of the '*exercitus Raetici*' which appears to date to the Civil Wars of 68-69.³⁸ *Cohors II Aquitanorum c. R.* is attested in Germania superior in 90 but had moved to Raetia by 116. Two Batavian cohorts, *cohors III Batavorum milliaria* and *cohors VIII Batavorum milliaria*, had also arrived by 116 but the former is also attested in 107 and so may have arrived directly from Britain. On the other hand it is believed the latter served in the Second Dacian War and then was stationed in Moesia inferior although there is no evidence for this.³⁹ The *cohors III Thracum (veterana)* named on the diploma of 107 is most likely the same as the *cohors III Thracum* attested in Pannonia in 80 and 84 and *cohors V Bracaraugustanorum* was in Upper Germany in the pre-Flavian period. *Cohors I Breucorum* was commanded by C. Minicius Italus in the reign of Vespasian but it is not certain where it was based.⁴⁰ The rest are not attested but *cohors I Flavia Canathenorum milliaria sagittaria*, a Flavian creation, could have been in Raetia from its creation.⁴¹

³¹ There is a fragmentary diploma of 112 from Dambach in southern Germany (RMD II 85) whose incomplete unit list has been assigned to Moesia inferior; for example P. A. Holder (n. 3) 104 and TABLE 2. However, in the light of the discovery of both constitutions for Raetia of 116, it is possible that the Dambach diploma also represents a grant to the garrison of that province. This is primarily because the extant letters of the first surviving unit name]VG SAG[can relate to *ala I Thracum Augusta sagittaria* in Raetia better than *cohors I Cilicum sagittaria* presumed to have been in Moesia inferior at this time. It is also feasible that the letters read as]AVG ET II M[are in fact]VC ET II A[. Again the latter could be units in Raetia – *cohors I Breucorum* and *cohors II Aquitanorum* rather than the suggested *cohors I Bracaraugustanorum* and *cohors II Mattiacorum*. This possibility is supported by Professor K. Dietz (pers. comm.) and see also Fl. Matei-Popescu (n. 39) whose conclusions were reached independently.

³² For more information about individual units, see H.-J. Kellner, „*Exercitus Raeticus*: Truppenteile und Standort im 1.-3. Jahrhundert n. Chr.”, BayerVbl 36, 1971, p. 207-215; and H. Wolff, „Das Heer Raetiens und seine Militärdiplome im 2. Jahrhundert”, BayerVbl 65, 1998, p. 155-172.

³³ It had been moved there from Germania inferior in the aftermath of the revolt of Saturninus early in 89.

³⁴ This identification is generally accepted though not certain, see J. E. H. Spaul (n. 47) p. 111-114.

³⁵ A tombstone from Solva in Pannonia superior of late first century date (AE 1997, 1261) which mentions a cavalryman of the *ala* should not be used to place the unit in that province because it is a monument to his father. Cf. B. Lörincz (n. 19) 21.

³⁹ Fl. Matei-Popescu, *On the problem of the presence of cohors IX Batavorum milliaria equitata in Moesia inferior*, ActaMN 41-42, 2004-2005 (forthcoming).

⁴⁰ PME II, IV, V M 60.

⁴¹ Cf. *cohors I Flavia Damascenorum milliaria sagittaria* also a Flavian creation which was in Germania superior by 90 (TABLE 6).

Information about the garrison of Noricum is much more sparse (TABLE 5).⁴² However, fragments from diplomas of 95 and 138 will shortly be published.⁴³ *Ala I Thracum veterana* is attested in the province in 79 and 95 and can probably be restored on the constitution of 106. By 126 it had been transferred to Pannonia superior. *Ala I Commagenorum* had been in Egypt in 83 but it had arrived in Noricum by 104 when it is attested building at the fort of Tulln.⁴⁴ By 138 it had been converted into a milliary ala.⁴⁵ Some of the cohorts can be identified. *Cohors I Asturum* is attested in 79 and 106; and *cohors I Flavia Brittonum* and *cohors III Tungrorum* in 95. The former remained while the latter had moved to Raetia by 122/124. The identity of other cohorts is not so certain. *Cohors V Breucorum* is attested in Pannonia in 80 but it can be plausibly restored on the diploma of 135/138. It is not attested in any other province so it could have been named on the diplomas of 106 and 132/133. It would seem that six cohorts were listed on the constitution of 135/138. One of these is likely to have been *cohors II Batavorum milliaria* which was transferred from Pannonia superior after 116. The last unit named on that constitution is perhaps *cohors II Tungrorum milliaria vexillatio* which is also attested in 132/133. It is not known when this vexillation arrived in the province but it should be noted that it is not named on any of the diplomas for Britain of Trajanic and Hadrianic date.⁴⁶ It is therefore even possible it was one of the cohorts named on the diploma of 106.

Germania superior

The Trajanic evidence for Germania superior indicates that most of the auxiliary units attested in the province prior to 98 remained there (TABLE 6).⁴⁷ The principle evidence is the constitution of 117 which lists two alae and seventeen cohorts. But there had been two more alae in 90. Since that date *ala I singularium* had been transferred to Raetia and *ala I Cannanefatium* had moved to Pannonia superior. *Cohors II Aquitanorum* had also moved to Raetia after 90. Not all the cohorts listed in 117 had been in the province in 90. *Cohors I civium Romanorum* and *cohors II Hispanorum pf* had been in Lower Germany in 101. The total of seventeen cohorts in 117 does not take into account *cohors XXIII voluntariorum*; *cohors XXVI voluntariorum*; *cohors XXX voluntariorum*; and *cohors XXXII voluntariorum*. Three of these were definitely in the province before the reign of Trajan and it is possible that *cohors XXX voluntariorum* was as well since it is not recorded elsewhere.

All of these units are attested in Germania superior during the reign of Hadrian. But it should be noted that at some date after 101 two alae were transferred there from Lower Germany. *Ala Indiana* had arrived by 129/130 while *ala Moesica* is first attested there in 185/186. For neither unit is it certain when the move was carried out.

Germania inferior

On his accession it is now clear that Trajan was governor of Germania inferior. He is recorded as such on the constitution of 20 February 98 awarded to its auxiliary garrison. Six alae and twenty four cohorts are listed on the copy which has survived (TABLE 7).⁴⁸ Using this evidence as a starting point it is evident that this total is not far from the total of units known to have been in the province when the epithet '*pia fidelis Domitiana*' was given by Domitian for the loyalty of the units during the revolt of Saturninus in Germania superior early in 89.⁴⁹ *Ala I singularium c.R. pf* and *cohors III Delmatarum* were transferred from the province

⁴² Further details about individual units can be found in G. Alföldy, *Noricum*, London 1974, p. 257-260.

⁴³ H. Ubl, *Neue Militärdiplome aus Niederösterreich*, forthcoming.

⁴⁴ H. Ubl, „Eine Bauinschrift aus dem Alenlager Comagena, Tulln, NÖ“, *RömÖst* 26, 2003, p. 23-29.

⁴⁵ H. Ubl, „Comagena (Comagenis)/Tulln am norischen Donauufer und die ala I Commagenorum“, *RömÖst* 26, 2003, p. 31-38.

⁴⁶ It is generally assumed it was one of the two *cohortes Tungrorum* which fought at Mons Graupius (Tacitus *Agric.* 36.1). See M. G. Jarrett (n. 52) p. 49-50.

⁴⁷ For details about units, see E. Stein, *Die kaiserliche Beamten und Truppenkörper im römischen Deutschland unter dem Prinzipat*, Wien, 1932; updated with caution where necessary by J. E. H. Spaul, *Ala*², Andover, 1994 and *Cohors*², Oxford, 2000.

⁴⁸ For details about the individual units, see J. K. Haalebos, „Trajan und die Hilfstruppen am Niederrhein: ein Militärdiplom des Jahres 98 n. Chr. aus Elst in der Over-Betuwe (Niederlande)“, *SaalburgJahrb* 50, 2000, p. 31-72. For the number of cohorts on the Elst diploma, see B. Pferdehirt, *op. cit.*, (n. 1), p. 22-29.

⁴⁹ P. A. Holder, „Exercitus pius fidelis: the army of Germania inferior in AD 89“, *ZPE* 128, 1999, p. 237-250.

to Upper Germany in the aftermath of the revolt and are attested there on 27 October 90.⁵⁰ *Cohors VI ingenuorum* and *cohors XV voluntariorum* are known to have been in Lower Germany but are not recorded on diplomas before the constitution of 5 September 152. There is now another early Trajanic diploma for the province. This dates to 13 March 101 and lists six *alae* once more but only nineteen cohorts. While five fewer cohorts are named than in 98 only two left permanently having been withdrawn to participate in the first Dacian War. Both *cohors I Vindelicorum milliaria c. R. pf* and *cohors II Brittonum milliaria c.R. pf* are attested in Moesia superior in 100. The other three, *cohors VI Breucorum*; *cohors VI Raetorum*; and *cohors VI Brittonum*, are once more attested in Germania inferior in 127. It is therefore not clear if they had been withdrawn to fight in the First Dacian War or happened not to have men eligible for the grant of 101. Further units may have been withdrawn in 102 for the war's second year of campaigning. *Cohors I Hispanorum pf* and *cohors I Pannoniorum veterana* are recorded on a constitution of 103/105 for Moesia superior. Two more cohorts, *cohors I Thracum c. R. pf* and *cohors III Lusitanorum pf*, are attested in Pannonia inferior in 110 and might have been withdrawn then or for the Second War. On one or other occasion *ala Batavorum c. R.* was withdrawn and is attested as *ala I Batavorum milliaria c.R. pf* in Pannonia superior in 112.

The constitution of 127 shows further changes had occurred by that date but after 101. Two new *alae*, *ala I Thracum* and *ala Gallorum et Thracum Classiana*, are named having been recorded in Britain in 124 and 122 respectively. These replace *ala Indiana Gallorum pf* and *ala Moesiaca*. The former is recorded in Germania superior in 129/130 while the latter is attested there in 185/186. Exactly when they left Germania inferior is not certain but it is possible they were withdrawn to participate in either the Dacian Wars or the Parthian War of Trajan. Of the cohorts, *cohors II civium Romanorum* and *cohors II Hispanorum* had been transferred to Germania superior by 117. *Cohors II Thracum* is attested in Noricum in 164.⁵¹ It most likely had been transferred by 135/138 when it can be restored on the diploma of that date.

Britannia

The diploma evidence for the garrison of Britain is most complete for the reign of Hadrian. This is why the constitution of 17 July 122 has been used as the key snapshot because it names thirteen *alae* and thirty-seven cohorts (TABLE 8).⁵² To these can be added *ala I Thracum*; *cohors II Pannoniorum*; *cohors I nauticarum*; and *cohors III Nerviorum* which are listed on other Hadrianic diplomas. For the reign of Trajan there are a number of diplomas which reveal only partial lists. These name ten *alae* and twenty-four cohorts. To this total can be added *cohors III Batavorum* and *cohors VIII Batavorum* since they are named on writing tablets from Vindolanda of early Trajanic date.⁵³ Also a soldier from *cohors III Gallorum* is recorded on a tombstone which is dateable to the early second century.⁵⁴ Not all the units attested in his reign were still in Britain to be named on the Hadrianic diplomas. *ala I Hispanorum Campagonum* in Britain in 98 is recorded in Pannonia inferior in 114. It therefore would have been withdrawn for one or other of the Dacian Wars. While it is named on the diploma of 19 January 103, *cohors I Alpinorum* had been moved to Moesia superior and is named on a constitution which can be dated to 103/105. Two further cohorts, *cohors III Batavorum* and *cohors VIII Batavorum* are attested in Raetia as *milliaria* before the end of Trajan's reign. It would seem that all three had been withdrawn from Britain for the Second Dacian War.⁵⁵ A further cohort, *cohors I Nerviorum*, is not attested anywhere after 105.⁵⁶

⁵⁰ By 107 *ala I singularium c.R. pf* had moved to Raetia. It has been suggested that *ala III Asturum c.R. pf* and *ala II Thracum Augusta pf* were in Germania inferior in 89 as temporary replacements for units serving on the Danube which were normally part of the garrison of the province and hence they were awarded the titles. The former had returned to Mauretania Tingitana by 103/104 and the latter to Mauretania Caesariensis by 107. See P. A. Holder (n. 49) p. 247-248.

⁵¹ AE 1977, 603 where it is called *cohors II Thracum eq pf*.

⁵² For further information about the units in Britain, see M. G. Jarrett, „Non-legionary troops in Roman Britain: Part one, the units”, *Britannia* 25, 1994, p. 35-77; and P. A. Holder, *Observations on the Roman military diploma of 14 April AD 135 from Wroxeter* in N. J. Higham (ed.), *Archaeology of the Roman Empire: a tribute to the life and works of Professor Barri Jones*, Oxford, 2001, p. 95-104.

⁵³ *Cohors III Batavorum* – *TabVindol* II 263 and 311; *cohors VIII Batavorum* – *TabVindol* II 263, 242; III 574 and others.

⁵⁴ RIB 620.

⁵⁵ It should be noted that there is no longer any firm evidence for the presence of *cohors VIII Batavorum* on the Lower Danube, see above under Raetia and note 39.

⁵⁶ The unit has been identified with the *cohors I Augusta Nerv(...)* recorded on the constitution for Britain of 23 March 178 (M. G. Jarrett (n. 52) 63 and RMD III 184 note 9). But see note 70 with RMD IV 294 note 7.

This means that the presence of five *alae* and fifteen cohorts in Britain can only be restored for the reign of Trajan. The *ala Augusta Vocontiorum* is recorded in a career which can be dated to his reign but it was in Lower Germany before it moved to Britain.⁵⁷ The date of arrival of *ala Gallorum Picentiana* in Britain is also unclear since it is last recorded in Germania superior on a diploma of 82. There is less evidence for the cohorts. *Cohors I Thracum* is attested in Britain on a pre-Flavian tombstone while *cohors I nauticarum* is attested on pre-Flavian tombstones at Nice-Cimiez in the Alpes Maritimae.⁵⁸ There is no evidence for the others but all are likely to have been in Britain at least from the Flavian era. Such is the uncertainty of the pre-Hadranic history of the cohorts in the garrison that it is not absolutely certain if the *cohors V Gallorum* named on the constitution of 122 is the same as the *cohors V Gallorum* attested in Pannonia inferior in 110. Because the latter cannot be traced elsewhere it makes an attractive suggestion. It is therefore also possible that the *cohors II Gallorum* in Mauretania Caesariensis in 107 was transferred to Britain by 122 rather than that cohort was part of a series of cohorts of Gauls in Britain perhaps from the invasion.⁵⁹

Mauretania Tingitana with Hispania

There are diplomas of 103/104, 109, and 114/117 for Mauretania Tingitana whose snapshots build up a representative picture of the auxiliary garrison (TABLE 9).⁶⁰ While that of 103/104 has not survived complete the total number of units named therein can be restored as five *alae* and eleven cohorts.⁶¹ Of these, *cohors I Bracarorum c.R.* can be equated with the cohort attested in Moesia inferior in 125.⁶² Exactly when it left is unclear but it could have been for the second Dacian War because it is not attested on the other two Trajanic diplomas which both list ten cohorts. The surviving evidence from before the reign of Trajan records the same five *alae* and five of the cohorts on a diploma for the province of 88. *Cohors I Ituraeorum* and *cohors I Asturum et Callaecorum* are both attested in the pre-Flavian period. The others are not known elsewhere and so may have been in Mauretania Tingitana in the Flavian period.

While no diploma is known for the garrison of Spain evidence from inscriptions point to a garrison of *ala II Flavia Hispanorum c.R.*; *cohors I Gallica*; and *cohors III Gallorum* in the reign of Trajan (TABLE 9).⁶³

Mauretania Caesariensis

Compared with the diploma evidence for the garrison of Tingitana there is little for that of Mauretania Caesariensis. This makes the snapshot provided by the diploma of 107 so important. It lists three *alae* and ten cohorts but this is not necessarily all the units which were in the province at the time (TABLE 10).⁶⁴ *Ala (gemina) Sebastena* is recorded on a tombstone of apparent Trajanic date having been in Syria as late as 93. *Cohors II Sardorum* is attested at Rapidum in Mauretania Caesariensis in 122 having been part of the garrison of Africa in the first century. It was probably in the province by the reign of Trajan. Two further cohorts, *cohors VI Delmatarum* and *cohors VII Delmatarum*, are attested in the

⁵⁷ The unknown equestrian first commanded a *cohors Hispanorum equitata* and then was tribune of *legio VIII Hispana* in Britain before his prefecture of the *ala* (PME II, IV Inc. 236). It is therefore not clear where he commanded the *ala*.

⁵⁸ *Cohors I Thracum* – RIB 291; *cohors I nauticarum* – the tombstones are collected in G. Laguerre, *Inscriptions Antiques de Nice-Cimiez*, Paris 1975.

⁵⁹ The suggestion that the cohorts are the same is made by J. Spaul (n. 47) 158. However, his further identification of this unit with the one in Moesia inferior in 99 and 105 is incorrect (O. Țentea, Fl. Matei-Popescu, *Alae et cohortes Daciae et Moesiae: a review and updating of J. Spaul's Ala² and Cohors²*, ActaMN 39-40, 2002-2003, p. 282).

⁶⁰ For individual units, see M. Roxan, „The auxilia of Mauretania Tingitana”, *Latomus* 32, 1973, p. 838-855.

⁶¹ Ten cohorts are definitely named but the fragment is damaged and illegible immediately after DECEM. See E. Papi, „Diploma militare da Thamusia (Mauretania Tingitana): 103/104”, ZPE. 146, 2004, p. 255-258. There is sufficient room for the names of eleven cohorts to be restored.

⁶² Fl. Matei-Popescu, „Despre identitatea cohortelor *I Bracaraugustanorum equitata* și *I Bracarorum civium Romanorum*” in *Corona Laureae. Studii în onoarea Luciei Țeposu Marinescu*, București, 2005, p. 313-318.

⁶³ For more information about the units, see P. Le Roux, *L'armée romaine et l'organisation des provinces ibériques d'Auguste à l'invasion de 409*, Paris, 1982. The evidence for *cohors III Gallorum* is fragmentary but the unit cannot be traced elsewhere (Le Roux 150-151).

⁶⁴ Details about specific units can be found in N. Benseddik, *Les troupes auxiliaires de l'armée romaine en Mauretanie Césarienne sous le Haut Empire*, Alger, 1982.

province on tombstones of first century date but not thereafter.⁶⁵ However, it is not definite that they had ceased to exist or had been withdrawn from the province by 107.

There is not much pre-Trajanic evidence for the units on the diploma. Only *ala II Thracum Augusta pf* and *cohors I Pannoniorum* are recorded on tombstones from the province. It is now clear that *ala Parthorum* had been based in Spain prior to its transfer since it is recorded on tiles found at Herrera de Pisuerga (Palencia).⁶⁶ It has been suggested that *ala I Nerviana Augusta fidelis milliaria* is to be equated with the *ala Flavia milliaria* recorded on a single inscription as in Syria in the reign of Domitian.⁶⁷ This is attractive but not certain. The only other unit for which there is earlier information is *cohors I Corsorum c.R.* which is best identified with the *cohors I Corsorum* attested in Sardinia at an early date.⁶⁸

Most of the units stayed in the province after the death of Trajan. Two cohorts are not attested in Mauretania Caesariensis after 107. *Cohors II Gallorum* might have stayed permanently or it might have been transferred to Britain by 122.⁶⁹ It is also feasible that at some time before 178 *cohors I Augusta Nerviana velox* had been transferred to Britain when it can be equated with *cohors I Aug(usta) Nerv(iana)* rather than remaining in the province.⁷⁰ While it is not clear where Q. Aelius Rufinus Polianus commanded *cohors Nur(r)itanorum* in the later second century.⁷¹

Africa with Sardinia and Cyrenaica

In recent years copies of two constitutions for the garrison of Africa have been discovered but both date from the reign of Hadrian (TABLE 11).⁷² That of 127 names *ala I Pannoniorum* and nine cohorts while the one of 128/129 lists *ala I Flavia (Numidica)* and six of the nine cohorts previously listed.⁷³ The pre-Hadrianic epigraphic evidence shows that both alae were in the province. Evidence for the cohorts is scarce and there are only tombstones of men of *cohors I Flavia* and *cohors II Hamiorum* which can be assigned a Trajanic date.⁷⁴ Two further cohorts, *cohors I Chalcidenorum* and *cohors VII Lusitanorum*, are recorded in Africa on career inscriptions of pre-Trajanic date and so their presence during Trajan's reign can be restored. The earlier existence of *cohors I Syrorum sagittariorum* is proven by a number of inscriptions one of which was found at Caesarea in Mauretania Caesariensis. It is therefore not clear when it arrived in Africa. There is also slight evidence for two other cohorts which might have been in the province during the reign of Trajan. *Cohors II gemella Thracum* is recorded on a number of inscriptions but none can be definitely assigned to the second century.⁷⁵ On a tombstone of late second century date from Simitthus there is a unit called *coh(ors) II Fl(avia) eq(uitata)*.⁷⁶ This is possibly a separate unit but it could just be a variant name of *cohors II Flavia Afrorum equitata*.

For convenience the garrisons of Sardinia and Cyrenaica are included here. There is a diploma of 96 for Sardinia which names *cohors I gemina Sardorum et Cursorum* and *cohors II gemina Ligurum et Cursorum* (TABLE 11).⁷⁷ The former is later attested in the province as *cohors I Sardorum*. The latter had been moved to Syria by 129. It is not clear when it arrived but it may have formed part of the army

⁶⁵ *Cohors VI Delmatarum* – CIL VIII 9377; AE 1921, 31; *cohors VII Delmatarum* – CIL VIII 9384, 21040.

⁶⁸ J. Spaul (n. 47), p. 50.

⁶⁹ See above under Britannia and note 59.

⁷⁰ See RMD IV 294 note 7 for a discussion of the evidence.

⁷¹ PME I, IV, V A 56.

⁷² Further information about the units can be found in Y. Le Bohec, *Les unités auxiliaires de l'armée romaine en Afrique Proconsulaire et Numidie sous le Haut Empire*, Paris, 1989.

⁷³ The unit list on the two copies of the constitution of October/December 127 is incomplete but the names can be supplied from the diploma of 128/129. See RMD V 368 note 2 and W. Eck, A. Pangerl, „Neue Konsulndaten in neuen Diplomen“, ZPE 152, 2005, p. 243-248.

⁷⁴ *Cohors I Flavia* – Y. Le Bohec (n. 72) 106 note 183bis; *cohors II Hamiorum* – ILAlg I 3765.

⁷⁵ Y. Le Bohec (n. 72) 91-93.

⁷⁶ AE 1992, 1821.

⁷⁷ For more information about individual units, see Y. Le Bohec, *La Sardaigne et l'armée romaine sous le Haut Empire*, Sassari, 1990.

which participated in Trajan's Parthian War. *Cohors I Macedonum* is attested in Cyrenaica in 209/211, but it is not attested elsewhere after it had been in Spain in the first century. It could therefore have been in Cyrenaica from the reign of Trajan.

Aegyptus

The diploma evidence from the reign of Trajan for Egypt dates to before 106. This reveals a garrison of three *alae* and seven cohorts (TABLE 12).⁷⁸ Not named on these diplomas is *cohors I scutata c.R.* which had been in the province from an early date. This suggests it was a citizen unit commanded by a tribune.⁷⁹ The diploma of 24 September 105 reveals that *cohors I Hispanorum* and *cohors I Thebaeorum*, in the province prior to that date had been transferred to Iudaea. Their place had been taken by *cohors I Augusta Lusitanorum* and *cohors II Thracum* which had previously been in that province. These moves took place not long before because the two cohorts in Iudaea were still included in a grant for units in Egypt. At some stage after 90 but before 127 *cohors I Thracum* was also moved to Egypt from Iudaea. Similarly *ala I Thracum Mauretana* was transferred from the same province to Egypt after 90 but before 142. *Ala veterana Gallica* had arrived before 130 having been in Syria in 91. On the other hand *ala Augusta (Xoitana)* had been moved to Syria after 105 but by 129. The change of province for the cohort and the three *alae* could have occurred at the time of Trajan's Parthian War with the possible exception of the move of *ala I Thracum Mauretana* which may not have moved until the Jewish War of Hadrian. Finally *cohors I Ulpia Afrorum* is first attested in Egypt in an equestrian career dating to the first part of Hadrian's reign.

Iudaea

Information about the garrison of Iudaea and of Arabia once that province had been created in 106 is largely dependent on diplomas from the reign of Domitian; from late in Hadrian's reign; and from the reign of Antoninus Pius (TABLE 13).⁸⁰ This makes it difficult to assess which units may have been in the provinces during Trajan's reign. As the key snapshot for the garrison of Iudaea the constitution of 90 has been chosen because it has the most complete unit list of two *alae* and seven cohorts. The later evidence for the *alae* is relatively straightforward. By 142 *ala I Thracum Mauretana* had been moved to Egypt while in 141/142 *ala veterana Gaetulorum* was part of the garrison of Arabia. Also in Arabia was *ala I Ulpia dromadariorum Palmyrenorum milliaria*, a Trajanic creation. Presumably the *ala* of Gaetulians was moved to that province after its annexation, but whether the *ala I Thracum Mauretana* became the sole cavalry unit in Judea is not clear nor is the date when it moved to Egypt.

Of the seven cohorts named on the diploma of 90 only *cohors I Damascena Armeniaca* and *cohors III Callaecorum Bracaraugustanorum* were still in the province on the diploma of 136/137. *Cohors II Cantabrorum* is not attested again while *cohors I milliaria sagittariorum* is known only from the Trajanic career of A. Pomponius Augurinus T. Prifernius Paetus.⁸¹ *Cohors I Augusta Lusitanorum* and *cohors II Thracum* are listed on the diploma for Egypt of 24 September 105 while *cohors I Thracum* also moved to Egypt, but by 127. On this diploma for Egypt *cohors I Hispanorum* and *cohors I Thebaeorum* are described as '*extranlatarum in Iudaeam*'. After the annexation of Arabia they were moved to that province where the latter is attested on papyri of 114 and 115 and the former is named on the diploma of 141/142 with the epithet *Cyrenaica*. The post-Trajanic evidence reveals six cohorts had been transferred to these provinces from Syria at some time after the death of Domitian. *Cohors I Augusta Thracum* and *cohors IIII (Callaecorum) Bracaraugustanorum* are recorded in Iudaea on inscriptions which are of Trajanic date. *Cohors I Thracum milliaria* is first attested in Judea in 124. But it is not clear when *cohors I Flavia c. R.*; *cohors I Sebastena milliaria*; and *cohors VI Hispanorum* moved from Syria. One unit, *cohors V gemella c. R.*,

⁷⁸ Up to date information about each unit can be found in R. Alston, *Soldier and society in Roman Egypt: a social history*, London, 1995. This can be supplemented by V. A. Maxfield, *The deployment of the Roman auxilia in Upper Egypt and the Eastern Desert during the Principate*, in G. Alföldy, B. Dobson, W. Eck (Hg.), *Kaiser, Heer, und Gesellschaft in der Römischen Kaiserzeit: Gedenkschrift für Eric Birley*, Stuttgart, 2000, p. 407-442.

⁷⁹ Cf. the omission of *cohors VI ingenuorum* and *cohors XV voluntariorum* from diplomas of Germania inferior (TABLE 7).

⁸⁰ For details about units, see M. P. Speidel, *The Roman army in Arabia*, in his *Roman army Studies*, 1, Amsterdam, 1984, p. 229-272; and P. Weiß-M. P. Speidel, „Das erste Militärdiplom für Arabia“, *ZPE* 150, 2004, p. 253-264.

⁸¹ PME II, IV, V P 72.

is attested for the first time in the career of [T. Flavius] Iuncus whose other commands were in the East.⁸² It is therefore likely he was tribune of the cohort in Iudaea before becoming tribune of *legio X Fretensis*. Two further cohorts, *cohors I Augusta Canathenorum* and *cohors I Thracum c. R.*, are only attested in Arabia after Trajan's death but must have been in existence earlier. On the other hand four cohorts in Syria Palaestina in 136/137 had been raised by Trajan and may have been based there from their creation.

Syria

In recent years the number of constitutions for units belonging to the auxiliary garrison of Syria has greatly increased. However, as with Judea and Arabia, none relate to the reign of Trajan (TABLE 14).⁸³ This is unfortunate because there were clearly many changes to the garrison before the stability of the reign of Antoninus Pius.⁸⁴ The key snapshot is represented by the pair of constitutions of 7 November 88. Together they list eight *alae* and nineteen cohorts. This total can be supplemented by *cohors I Thracum milliaria* and *cohors II Thracum Syriaca* which are named on a constitution of 12 May 91.

None of the *alae* were still in Syria by the death of Hadrian. *Ala VII Phrygum* was there to be named on a diploma dateable to 127/136,⁸⁵ but by 136/137 it was in Syria Palaestina. *Ala II Pannoniorum* and *ala praetoria singularium* had left by 94.⁸⁶ *Ala Sebastena gemina* had moved to Mauretania Caesariensis by the death of Trajan while *ala III Augusta Thracum* was apparently still in Syria for M. Cocceius Valens to have received a grant from Nerva and to have settled there.⁸⁷ By 126 it had been moved to Pannonia superior. *Ala veterana Gallica* had left the province before the Jewish War in Hadrian's reign being attested in Egypt in 130. The other two *alae*, *ala Gallorum et Thracum constantium* and *ala Gallorum et Thracum Antiana*, are attested in Syria Palaestina in 136/137. When the *alae* recorded on the Hadrianic and Antonine diplomas arrived is also not clear. Two *alae* are named on the constitution of 22 March 129. Nothing earlier is known for *ala I Flavia Agrippiana* while *ala Augusta (Xoitana)* had been in Egypt in 105. *Ala I Thracum Herculiana* can be identified on a diploma dateable to 129/134 but in 101 it was in Cappadocia. The other two *alae* are Trajanic creations and presumably had been stationed in the province immediately after they had been raised. At present the evidence points to *ala III Augusta Thracum*; *ala veterana Gallica*; and *ala Sebastena gemina* having been withdrawn during Trajan's reign and having been replaced by *ala Augusta (Xoitana)* and *ala I Thracum Herculiana*. *Ala Gallorum et Thracum constantium*; *ala Gallorum et Thracum Antiana*; and *ala VII Phrygum* seem to have formed part of the first garrison of the renamed Syria Palaestina after the Jewish War.

The picture is much the same for the twenty-one cohorts named on the Domitianic constitutions. *Cohors I milliaria* had moved to Iudaea by 90 while *cohors I Augusta Thracum*; *cohors I Thracum milliaria*; and *cohors III (Callaecorum) Bracaraugustanorum* had moved to the same province before the Jewish War of Hadrian. Two further cohorts, *cohors I Flavia c.R.* and *cohors I Sebastena milliaria*, may have been transferred as a result of that war and are attested in the newly named Syria Palaestina on a diploma of 136/137. *cohors I Ituraeorum* and *cohors Musulamiorum* moved respectively to Cappadocia and Lycia by the death of Trajan while *cohors I Numidarum* was transferred to Cappadocia between 88 and 135. For *cohors II Thracum c.R.* there is no definite later evidence as yet while *cohors III Thracum Syriaca* is only known from the career of L. Valerius Proculus who was prefect in the reign of Hadrian.⁸⁸ As for units not attested before the reign of Hadrian it is possible that *cohors I Flavia Chalcidenorum* had been in Syria from the Flavian period although it is not attested there before 153. Three cohorts had arrived. *Cohors II gemina Ligurum et Corsorum* had moved from Sardinia to Syria between 96 and 129. *Cohors VII Gallorum* is attested in Moesia inferior in 111 but had been moved to the province by 127/136 while *cohors I*

⁸² PME IV, V F 52bis. He first commanded *cohors Pannoniorum*, most likely in Egypt, then *cohors V Gemella c.R.* After this he was a tribune of *legio X Fretensis* in Judea and finally prefect of *ala Gallorum veteranorum* in Syria or Egypt.

⁸³ For more details about individual units, see P. Weiß, „Die Auxilien des syrischen Heeres von Domitian bis Antoninus Pius: eine Zwischenbilanz nach den neuen Militärdiplomen“, Chiron 36, 2006, p. 276-296.

⁸⁴ See P. A. Holder (n. 3) p. 115-117.

⁸⁵ See note 11.

⁸⁶ However, *ala praetoria singularium* later returned, see above under Moesia superior.

⁸⁷ AE 1982, 901.

⁸⁸ PME II, IV, V V 29. After his cohort command he was tribune of *legio VII Claudia* in Moesia superior.

Sugambrorum tironum, last attested in Moesia inferior in 116, had arrived by 153. It is possible that the first two moved East for Trajan's war against the Parthians, but the latter was most likely transferred to participate in the Jewish War of Hadrian. Seven cohorts, all raised by Trajan, are first attested in Syria while an eighth, *cohors II Ulpia Petraeorum milliaria*, is recorded solely in a Trajanic career without the province being named.⁸⁹ The seven were apparently in Syria from their creation although *cohors II Ulpia Paphlagonum* and *cohors III Ulpia Paphlagonum* are not attested there before 153 and 157 respectively.

Cappadocia

There are now three auxiliary constitutions known for the province of Cappadocia et Galatia of which two relate to the reign of Trajan (TABLE 15).⁹⁰ Unfortunately, the most complete which dates to 101, has not been published and is known only from the outer face. The known transcript is apparently not complete because there is no mention of the number of cohorts who were eligible for the grant nor is the number of alae certain.⁹¹ The names of four alae and thirteen of the possible fourteen cohorts can readily be recognised. Three of the four alae had been in the province in 94. The odd one out, *ala I Claudia Gallorum*, had been in Moesia inferior in 97 and had returned there by 105 which suggests it had been moved temporarily to Cappadocia for the duration of the First Dacian War to replace units or a vexillation withdrawn from the province to participate in the war.⁹² One unit which might have been withdrawn is *ala II Gallorum* which was definitely in Cappadocia in 135 but which cannot be assigned a province after it is attested in Spain prior to the death of Nero.⁹³ Two more alae are attested in the reign of Hadrian. Both *ala I Ulpia Dacorum* and *ala II Ulpia Auriana* were Trajanic creations. On the other hand *ala I Thracum Herculana* had been moved to Syria by 129/134; perhaps by the death of Trajan.

Of the thirteen recognisable cohorts on the diploma of 101, four can definitely be assigned to Cappadocia prior to that date. Two had been transferred to the province. *Cohors I Ituraeorum milliaria* is best equated with the *cohors I Ituraeorum* attested in Syria in 93 while *cohors I Raetorum* was in Moesia inferior in 92.⁹⁴ For *cohors I Apamenorum*; *cohors III Augusta Cyrenaica*; and *cohors III Syrorum sagittariorum* there is earlier equestrian career evidence which cannot be assigned a province.⁹⁵ There is nothing known about the other four. A number of other cohorts, first attested in Cappadocia in 135, may have been part of the garrison at some time during Trajan's reign. *cohors I Numidarum* had been in Syria in 88 while *cohors I Apula c.R.* is attested on an early tombstone. There are a number of early inscriptions which name a *cohors I Germanorum*, but none can definitely be connected to the one in Cappadocia.⁹⁶ Two cohorts definitely arrived after 101. *Cohors III Ulpia Petraeorum milliaria sagittariorum* was raised after the annexation of Arabia in 106 and *cohors IIII Raetorum* had been in Moesia superior until it is recorded as on an expedition in 115. Finally *cohors equitata (milliaria) c.R.* can only be assigned a province (Armenia) in the reign of Marcus Aurelius but was perhaps normally based in Cappadocia. Three of these cohorts left Cappadocia at some time after 101. *Cohors I Ituraeorum milliaria* is attested in

⁸⁹ C. Camurius Clemens had been prefect of *cohors VII Raetorum* in Upper Germany before he became tribune of the cohort and his third militia was as prefect of *ala Petriana milliaria* in Britain (PME I, IV, V C 72). It is therefore not clear where *cohors II Ulpia Petraeorum milliaria* was based.

⁹⁰ For further information about individual units, see E. Ritterling, „Zur Erklärung von Arrians Ektaxis kat'Alanon", WienStud 24, 1902, p. 359-372; and M. P. Speidel, *The Roman army in Asia Minor: recent epigraphical discoveries and research*, in his *Roman Army Studie*, I, Amsterdam, 1984, p. 273-300.

⁹¹ Without knowing the number of cohorts named in the grant it is not clear if the list of cohorts is correct since a *cohors I Italica milliaria* and a *cohors I Italica voluntariorum milliaria c. R.* are named (B. Pferdehirt, *op. cit.*, (n. 1) 18-19) The word for the number of alae is not complete.

⁹² Cf. *ala I Flavia Gaetulorum* in Pannonia inferior and *ala I Pannoniorum* in Dacia and above under Moesia inferior.

⁹³ Because the diploma of 101 has not been published there is the possibility that the ala was listed there since it is possible that five alae not four were named, cf. note 91.

⁹⁴ The latter is perhaps another example of a temporary transfer in time of war as with *ala I Claudia Gallorum*. In this instance it became permanent. Cf. *cohors II Augusta Nerviana Pacensis Brittonum milliaria* in Pannonia inferior.

⁹⁵ *Cohors I Apamenorum* – C. Nasennius Marcellus (PME II, IV, V N 6 with P. A. Holder, „Two commanders of ala Phrygum", ZPE 140, 2002, p. 287-289; *cohors III Augusta Cyrenaica* – [.] Publius Memorialis (PME II, IV, V P 111; *cohors III Syrorum sagittariorum* – Cn. Munatius Aurelius Bassus (PME II, IV, V M 72).

⁹⁶ Aquileia, AE 1955, 956; Praeneste, CIL XIV 2960 = PME II, IV, V V 137; and Sentinum, CIL XI 5745 = PME I, IV A 95. The latter is possibly more likely to relate to the cohort in Moesia inferior, see note 7.

Dacia in 109 and 110 but had returned by 135.⁹⁷ The other two moved permanently. *Cohors I Apamenorum* was in Egypt by 144 and *cohors II Augusta Thracum* had been transferred to Pannonia inferior by 135. The post-Trajanic evidence for *cohors I Claudia*; *cohors II Claudia*; and *cohors III Syrorum sagittariorum* cannot be assigned a province. It may be that they were still in the province but not included by Arrian in his battle plan.

Two other provinces in Asia Minor are known to have had auxiliary garrisons in the reign of Trajan. *Cohors I Musulamiorum* was in Lycia having been transferred from Syria at some time after 91 while in Bithynia was *cohors VI equestris*.

Conclusion

The province by province review of the evidence has shown that the increase in the number of auxiliary constitutions for the reign of Trajan can produce a reasonable picture of unit deployment despite obvious gaps like the lack of any diplomas for Syria and Iudaea from his reign. The results are also not so detailed because provincial garrisons were not yet as settled as in the reigns of Hadrian and Antoninus Pius. Certain trends however are clear for Trajan's reign. Most of the *alae* and cohorts which fought in the First Dacian War were already on the Danube. Only for the Second Dacian War were many units drafted in from provinces like Britain and Lower Germany which had large garrisons and were not near to the war zone. The potential for the movement of units for imperial expeditions is highlighted by the diploma of March/August 115 for Moesia superior which names one *ala* and probably eight cohorts as '*transsatis in expediti[one]*' whereas only *ala I Flavia Augusta Britannica milliaria c.R.* is '*missa in expeditionem*' according to a constitution of 1 September 114 for Pannonia inferior. But the latter constitution also demonstrates that secondary moves took place with units from a neighbouring province which might have sent only vexillations to the war being transferred to a province like Pannonia inferior from which complete units were withdrawn so that security might be maintained. Units from the garrison of Moesia inferior may have fulfilled such a role in Cappadocia for the First Dacian War and in Dacia and Pannonia inferior for the Parthian War.⁹⁸ The nature of the troop concentrations employed by Trajan in his major wars is also highlighted by the location of units with the epithet *Ulpia* which were raised by him. Only *ala I Ulpia contariorum milliaria* and *cohors I Ulpia Pannoniorum milliaria* are recorded on the Danube and were in existence for the First Dacian War.⁹⁹ There are a further five *alae* and fourteen known cohorts attested in eastern provinces. Only *ala I Ulpia Dacorum* and *cohors I Ulpia Dacorum* might have been raised prior to 106.¹⁰⁰ The remainder may have been raised specifically for service in the East but not necessarily for the Parthian War since the six *cohortes Petraeorum* could have been raised in 106 after the annexation of Arabia.

Overall the new diploma evidence has increased our knowledge. It has helped to solve questions of unit identity such as the number of *cohortes Montanorum* in existence in Trajan's reign but new units have been partially revealed such as *cohors III Aug(usta) Nerv(iana) [Brittonum milliaria?]* which was part of the garrison of Moesia superior in 115. There are also unusual constitutions such as the one of March/April 100 for Cappadocia which was awarded to only one cavalryman and one decurion!¹⁰¹ More importantly new discoveries are still being made such as the diploma for Moesia inferior of 116.¹⁰² There is thus the potential for as detailed a picture of auxiliary deployment in Trajan's reign as there is for the reigns of Hadrian and Antoninus Pius.¹⁰³

⁹⁷ See above under Dacia with note 29.

⁹⁸ In Cappadocia – *ala I Claudia Gallorum*, *cohors I Raetorum*; in Dacia – *ala I Pannoniorum*; in Pannonia inferior – *ala I Flavia Gaetulorum*, *cohors II Augusta Nerviana Pacensis Brittonum milliaria*.

⁹⁹ B. Lörincz (n. 19) p. 18-19 and p. 40-41.

¹⁰⁰ *Cohors I Ulpia Dacorum* is first recorded in Syria on the constitution of 22 March 129. The recipients of all the known copies had served in the cohort which suggests that a large number of Dacians were recruited in about 103/104 prior to the annexation of Dacia in 106. This raises the question of whether these Dacians lived south of the Danube like the other Dacians recorded on diplomas from 70 onwards. See W. Eck, A. Pangerl, „Neue Diplome für die Auxiliartruppen von Syria und Syria Palaestina“, *Chiron* 36, 2006, p. 245-247.

APPENDIX

EPIGRAPHIC AND WRITTEN SOURCES

Full citations of texts not available in standard epigraphic or papyrological sources are given at relevant places in the notes. In the tables diplomas are indicated by year alone while here the exact date (where known) and the number and type of units is also given. Inscriptions are divided into tomb(stones); (equestrian) career (inscriptions); ded(ications) which may be dated altars or dated building texts but may also include papyri. Otherwise ink documents are called pap(yri) or (writing) tab(lets). Unit names in the following sections are reproduced as they are inscribed or written except that names from Greek sources have been translated into Latin.
